TUTOR 2

Slide and Film
Strip Projector

The New Rank Aldis TUTOR 2

The outstanding Slide and Film Strip projector now with more features than ever before.

The new Tutor 2 is the latest in a line of Slide and Film Strip projectors that have become better and better whilst retaining the virtues that have made their predecessors standard equipment in so many schools and training centres.

Whether you need to show slides, film strips or both, the new Tutor 2 gives you outstanding light output, ease of use, and reliability.

The New Rank Aldis Tutor 2 Projector is manufactured, distributed and guaranteed by

Rank Audio Visual Ltd.
P.O. Box 70, Great West Road,
Brentford, Middlesex TW8 9HR
Tel: 01-568 9222

Outstanding Light Output

If you have to project in near daylight conditions the Tutor is for you. The 24v 250W. quartz halogen lamp combines with a superb lens system to give a light output unrivalled in its class.

Ease Of Use

You want to show film strips? Just slip the film carrier on to the two prongs, add the lens, tighten up and you're ready to go. And in a matter of seconds you can change from half frame to full frame film strip.

Slide shows are just as simple with the new magazine attachment, you can project a prepared programme, or select any individual slide at random. Whichever attachment you are using, the new Tutor 2 can be easily carried from room to room. The new open ended handle enables you to find the right balance point always.

Reliability

The British made Tutor 2 is as solid and well built as it looks. You can rely on it to perform without problems whether you use it round the clock, or for short spells. Continuous cooling by turbo fan together with two heat filters and a new ventilation system ensure that your valuable slides and film strips are kept in mint condition.

Lenses

The Tutor 2 is just about the most versatile projector there is and the range of lenses available enables it to cope with just about any projection problem around.
